Summary

Flutter Developer & UI/UX Designer with **3+ years of experience** building modern, responsive and user-focused mobile applications for Android and iOS. Skilled in **Flutter, Dart, Figma, Firebase, REST APIs, Python, SQL and Power BI**. Experienced in designing and developing applications from concept to deployment, including authentication, APIs, maps, geolocation, chat, payments, notifications and real-time features. Focused on pixel-perfect UI, reusable components, responsive layouts, clean implementation, performance and delivering production-ready mobile solutions.

Professional Experience

12/2023 – Present	Flutter Developer & UI/UX Designer
Gujranwala, Pakistan	<i>Freelance / Client Projects</i> - Designed and developed cross-platform Flutter applications for Android and iOS with modern, responsive and production-ready interfaces. - Created high-fidelity UI/UX designs in Figma, including wireframes, user flows, prototypes, reusable components and developer-ready layouts. - Integrated Firebase and REST APIs for authentication, data management, real-time functionality and backend-connected application workflows. - Implemented application features including Google Maps, geolocation, chat, notifications, payments, product catalogs, carts, checkout and order management. - Developed mobile applications from initial concept through UI design, Flutter development, testing, debugging, polishing and deployment. - Collaborated with clients to understand requirements, improve user experience, implement requested features, and deliver solutions according to project requirements.

Education

10/2023 – Present	Bachelor Science of Computer Science
Gujranwala, Pakistan	<i>Government College University, Faisalabad</i>

Skills

Mobile Development:

Flutter, Dart, Android, iOS, Cross-Platform Development

Backend & Integration:

Firebase, REST APIs, API Integration, Authentication, Cloud Services

Programming & Data:

Python, SQL, Data Analysis, Data Visualization, Power BI, Microsoft Excel

Development:

Bug Fixing, Feature Development, Testing, Performance Optimization, Play Store Submission

UI/UX Design:

Figma, Wireframing, User Flows, Prototyping, Design Systems, Responsive Design, Pixel-Perfect UI

App Features:

Google Maps, Geolocation, Notifications, Chat, Payments, E-commerce, Food Delivery

AI & Machine Learning:

Machine Learning, NLP, Generative AI, AI Tools, Prompt Engineering

Projects

- 06/2026 – 07/2026 **Nova Finance — Personal Finance Mobile App**
Flutter | Dart | Riverpod | FL Chart | Material 3 | MVVM
- Designed and developed a modern finance application focused on delivering a **premium banking and financial management experience**.
 - Built **finance dashboard, transaction details, analytics, budget planning, interactive charts and balance tracking** features.
 - Implemented **360° ATM card rotation, animated balance counters, smooth transitions and micro-interactions** to enhance user experience.
 - Added **Light/Dark themes, responsive layouts, reusable widgets, Material 3** and MVVM-based architecture for maintainable development.
- 02/2026 – 04/2026 **Domdijini — Construction Management Mobile App**
Flutter | Cross-Platform | Real-Time Features | Admin Panel
- Designed and developed a construction management platform for **construction companies, contractors, builders, engineers, site managers and communities**.
 - Implemented **project management, real-time progress tracking, budget and expense management, finance and payment tracking**.
 - Built collaboration features including **team/community management, real-time chat, notifications and voting/decision management**.
 - Developed **reports and analytics dashboards** along with a complete Admin Panel for managing users, projects, finances and reports.
- 10/2025 – 11/2025 **SubArfa — Social Media Engagement & Rewards Platform**
Flutter | Firebase | Cross-Platform | Admin Panel
- Developed a cross-platform mobile application that enables creators to promote their **YouTube, Instagram and social media content** through a task-based engagement system.
 - Implemented **task-based earning, social media campaigns, referrals, rewards and ad monetization** features.
 - Integrated **Firebase backend and real-time notifications** for secure and responsive application workflows.
 - Developed a comprehensive **Admin Panel** for managing users, tasks, payments, campaigns and platform activities.

Certificates

- Cursa Certified Advanced Flutter & Dart Course
- Cursa Certified Principle UI/UX
- The Digital Adda Certified Program in Google Flutter & Dart
- Digiskills Certified Freelancing
